CLIENT
Landing and sign-in pages
Dashboard
Overview, Decisions and Analytics tabs; 1-10 pickers start unset
Decision report
downloaded HTML file
ACCESS
Public routes
no token check
Proxy (proxy.ts)
verifies the login token in the cookie and passes the user ID to the routes
SERVER
Auth
bcrypt hashing, login rate limit
Decisions
owner check, prediction lock
Outcomes
atomic claim, date check
Analytics
one query, daily snapshot
Export
all fields escaped
Dashboard page
server-rendered; one query for all of the user's outcomes
Scoring module (lib/analytics/scores.ts)
pure functions, no I/O; also imported by the tests, simulations and real-data replay of the evaluation kit
DATA
Drizzle ORM
typed queries generated from the database schema
PostgreSQL
Neon serverless driver (hosted) or node-postgres (any other server)
users
decisions
outcomes
decision_metrics
